PROFILE

I have 7+ years of experience in programming. I started my journey in 2016 as a web developer intern, with an emphasis on PHP and WordPress. After that, I decided to evolve, which led me to a senior level of full-stack development, from **DevOps** with Docker, Linux, Apache, NGINX, and NodeJS, to **Back-End** with Laravel, WordPress, ExpressJS, MySQL, PostgreSQL, and MongoDB, **Front-End** with JavaScript/TypeScript, React, NextJS, Angular, Svelte, SvelteKit, Bootstrap, TailwindCSS, SASS, and jQuery, **Desktop** with JavaScript/TypeScript and ElectronJS, and, finally, **Mobile** with JavaScript, Ionic, and React Native.

I like to keep studying and evolving my knowledge, as well as my soft skills, focusing on staying updated with market-leading technologies. Also, I enjoy challenges that keep me engaged and excited in the projects I'm working on.
